Lab Assignment 1

Note:

1. Introduce Dev C++ IDE, how to open, save, create new file, compile and run the program.

2. Explain the process of compilation.

3. Introduce headerfiles, main(), body of the program, return statement to students with the following programs.

1. Write a program (WAP) to display "Hello World" on console display.
2. WAP to input an integer and display it.
3. WAP to input a decimal number and display it.
4. WAP to input a character and display it.
5. WAP to add, subtract and multiply numbers. [Note: Avoid Divide operation, we will do it in next lab after type casting]
6. WAP to calculate gross salary of a person, where ***gross_salary=basic+da+ta*** and da is 10% of basic and ta is 12% of basic.
